5. SERVICES OFFERED

(i) Currently under the discretionary services, the following scheme is offered to investors:

- **OHM ABSOLUTE**

Investment objective: “Ohm Absolute” is an equity scheme aiming to provide long term capital appreciation by primarily investing into aggressive growth opportunities available across all market caps. Since the objective of the scheme is to pursue aggressive opportunities, the scheme is designed for those investors who hold a long-term investment view and who accept undergoing of significant fluctuations in the value of their investments in order to achieve fair enough long term returns. It is primarily intended that the underlying investments made will be on a diversified basis. The scheme will be directly investing mainly in equities and equity-related investments. The portfolio under this scheme may also include bonds, short term and long term deposits and other investments. The intended asset allocation as aforesaid is for reference only and may be changed as and when the Portfolio Manager deems appropriate.

For efficient portfolio management, the portfolio of any underlying investments of this Scheme may acquire or sell, financial futures contracts and financial option contracts for hedging purpose, may engage in security lending, enter into repurchase agreements and may invest in other allowable instruments as investment.

Investment Strategy: The Portfolio will be investing in potential growth companies with market capitalization that may range from and between the smallest to the largest companies.

This scheme primarily identifies and invests in companies that have potentials and continue to grow due to new, improved or upgraded products, services or business operations or volume expansion or due to changes in fiscal or monetary policies or economic developments.

Disclosure Document for September – 2011

The Portfolio Manager will look for companies that are already recognized as leaders in their respective industry and try to find out new innovators within their field.

The companies in which this scheme invests may be in the developmental stage or may be older companies undergoing significant changes. As a result, they may be subject to greater business risks and more sensitive to changes in economic conditions than larger, more established companies.

The Portfolio Manager may also seek value unlocking opportunities in companies which may be out of favor by street for any reason. The Portfolio Manager watch out for any catalyst, that might be either a change in management, or potential sells business / any units or any other value unlocking opportunity etc.

Other Features of the Scheme: Preference will be given to businesses with high RoE. However, companies which may improve their RoE over next 2-3 yrs may also be added. Money may also be invested in IPO's which come at reasonable valuations.

PEG ratio will be a major tool to select companies. Active research will be major backbone for this scheme. Companies with long term business models will be preferred. Companies with higher future cash flows and ability to deploy this cash flow will be looked after.

Exit: Since this scheme is meant for investors with longer term horizon, it is expected that minimum holding period will be at least three years. To discourage any earlier withdrawal of money, Portfolio Manager has decided to have an exit load if money is withdrawn before 1 year.

Exit Load Structure	Exit Load
Withdrawal	
< 1 year	2 % of outstanding NAV
> 1 year	No exit load

Risk Profile: Aggressive Investor

To summarize the essential features of the above schemes are as under:

1. Minimum Portfolio Size: Rs.5 lakhs cash or approved securities per client.
2. Valuation Report (NAV Report) / Holding Statement is being sent on monthly basis.
3. Transaction statement is being sent every month.
4. Contract notes (if any) would be sent regularly or as agreed with the client.
5. Ledgers and Bank statements (if any) would be sent quarterly or as and when required by the client.

Note:

(a) Investment in all schemes shall be in accordance with the Act, the PMS Rules and the PMS Regulations.

(b) In respect of all the above schemes, the un-invested amount in all the above schemes may be deployed in liquid fund schemes, debt oriented schemes of mutual funds, gilt schemes, bank deposits and other short term avenues for investments.

(c) The Portfolio Manager, with consent of the Client, may lend the securities through an approved intermediary, for interest.

(d) The Portfolio Manager would not invest in any of the associate / group companies of the portfolio manager.

6. RISK FACTORS

The investments made in the securities are subject to market risk and there is no assurance or guarantee that the value of or return on investments made will always appreciate, it could depreciate to an unpredictable extent. Following are the risk factors as perceived by management:

- Investment in equities, derivatives and mutual funds are subject to market risks and there is no assurance or guarantee that the objective of the scheme will be achieved.
- As with any investment in securities, the NAV of the Portfolio can go up or down depending upon the factors and forces affecting capital markets. The performances of the schemes may be affected by changes in Government Policies, general levels of interest rates and risk associated with trading volumes, liquidity and settlement systems in equity and debt markets.
- The past performance of the Portfolio Manager does not indicate the future performance of the same scheme in future or any other future schemes of the Portfolio Manager. Investors are not being offered any guaranteed returns through these schemes.
- The names of the scheme are not indicative of their prospects or returns. The performance in the equity schemes may be adversely affected by the performance of individual companies, changes in the market place and industry specific and macro economic factors.
- Investment in debt instruments and other fixed income securities are subject to default risk, liquidity risk and interest rate risk. Interest rate risk result from changes in the demand and supply for money and other macroeconomic factors and creates price changes in the value of the debt instruments. Consequently, the NAV of the portfolio may be subject to fluctuation.
- Investment in debt instruments are subject to reinvestment risks as interest rates prevailing on interest amount or maturity due dates may differ from the original coupon of the bonds, which might result in the proceeds being invested at a lower rate.
- The schemes may invest in non- publicly offered debt securities and unlisted equities. This may expose the schemes to liquidity risks.
- Engaging in securities lending is subject to risks related to fluctuations in collateral value/settlement/liquidity/counter party. The scheme may use derivative instruments like index futures, stock futures and option contracts, warrants, convertible securities, swap agreements or any other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the regulations and guidelines. Usage of derivatives will expose the plan to certain risks inherent to such derivatives. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. As and when scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand.
